Team ID	SWTID-2026-3342
Project Name	AI BlogNest API
Maximum Marks	2 Marks

Customer Journey Map

Mapped for Priya's end-to-end journey through AI BlogNest, from account setup to publishing an AI-assisted post and moderating reader engagement.

Phase of Journey	Stage 1: Account & Access Setup	Stage 2: Content Creation	Stage 3: Publish & Engage
Actions What does the customer do?	Registers/logs in; is assigned a role (Admin/Editor/Author/Reader); receives a JWT for subsequent requests	Writes a post manually, or supplies a topic to the AI Blog Generator; organizes it with a category; saves it as a draft	Publishes the post; readers view, search and comment; Editors/Admins moderate comments and review drafts
Touchpoint What part of the service do they interact with?	POST /api/auth/register , POST /api/auth/login	POST /api/blogs , POST /api/ai/generate-blog (Google Gemini integration)	GET /api/blogs , comment endpoints, POST /api/ai/summarize
Customer Thought What is the customer thinking?	"I hope my account and role are set up correctly for what I need to do."	"Can this actually save me time on the first draft?"	"Are readers engaging, and are the comments staying on-topic?"
Customer Feeling What is the customer feeling?	Cautiously optimistic	Relieved when AI produces a usable first draft	Confident and in control of the content pipeline
Process Ownership Who is in the lead on this?	Auth Controller & Role Middleware – Sivaraj S	Blog Controller / AI Blog Generator – Veron Joseph Dcouto, Alfred Vishal A	Comment Moderation & AI Summarizer – Navin P, Alfred Vishal A
Opportunities How can we improve this stage?	Add email verification to reduce fake sign-ups	Let authors regenerate/refine an AI draft with follow-up prompts	Add a categories collection and a likes/reactions layer for richer discovery
