

Problem-Solution Fit

Date	17 September 2026
Team ID	SWTID-2026-3342
Project Name	AI BlogNest API
Maximum Marks	5 Marks

Problem-Solution Fit Canvas

1. CUSTOMER SEGMENT(S) [CS] Content creators and small editorial teams who run one or more blogs and need help writing, organizing, and moderating content (persona: Priya, content creator)	6. CUSTOMER LIMITATIONS [CL] Eg. Budget, Devices — limited writing time, no dedicated editorial staff, needs a system simple enough for guest Authors/Editors to use immediately	5. AVAILABLE SOLUTIONS PROS & CONS [AS] Generic blogging platforms: easy to publish, wide adoption (pro); no built-in AI drafting/summarization, weak role separation, manual comment moderation (con)
2. PROBLEMS / PAINS + ITS FREQUENCY [PR] Writing every post from a blank page (daily/weekly); no fast way to summarize long posts (recurring); no clean role separation between Admin/Editor/Author/Reader (ongoing)	9. PROBLEM ROOT / CAUSE [RC] Existing blogging tools focus purely on publishing mechanics, not on AI-assisted drafting or structured, role-aware content governance	7. BEHAVIOR + ITS INTENSITY [BE] Writes/reviews content several times a week; intensity spikes around publishing deadlines and comment moderation backlogs
3. TRIGGERS TO ACT [TR] A new topic to cover with no draft ready; a long post that needs a quick summary for readers; a spam or off-topic comment needing moderation	10. YOUR SOLUTION [SL] AI BlogNest: a secure Node.js/Express REST backend where role-based users register, write or AI-generate blog posts, organize them with categories/tags, summarize long content, and manage reader comments — all behind JWT authentication	8. CHANNELS OF BEHAVIOR [CH] ONLINE – CMS dashboards, note-taking apps, AI writing assistants OFFLINE – manual drafting, in-person editorial review
4. EMOTIONS BEFORE / AFTER [EM] Before: time-pressured and creatively drained by the blank page and moderation backlog. After using AI BlogNest: confident and efficient, with AI handling first drafts/summaries and roles keeping the workflow orderly.
