|---------------|-------------------|
| Date          | 19 September 2026 |
| Team ID       | SWTID-2026-3342   |
| Project Name  | AI BlogNest API   |
| Maximum Marks | 5 Marks           |

## Product Backlog, Sprint Schedule, and Estimation

The 15–29 September 2026 build cycle was split into two sprints: **Sprint-1 (19-23 Sept)** covering project setup, database configuration and authentication/roles (Epics 1, 2 & 4), and **Sprint-2 (24-27 Sept)** covering blog, comment and AI modules (Epics 3 & 5), leaving 28–29 Sept for testing, documentation and demonstration.

| Sprint   | Functional Requirement (Epic)   | User Story No. | User Story / Task                                                                                                                                                                 | Story Points | Priority | Team Member         | Sprint Start | Sprint End (Planned) |
|----------|---------------------------------|----------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------|----------|---------------------|--------------|----------------------|
| Sprint-1 | Project Setup (Epic 2)          | USN-1          | As a developer, I can initialize the Node.js project (Client/Server folders, <code>npm init -y</code> ) with Express and Mongoose so the backend has a working foundation.        | 2            | High     | Sivaraj S           | 15 Sep 2026  | 16 Sep 2026          |
| Sprint-1 | Project Setup (Epic 2)          | USN-2          | As a developer, I can configure environment variables ( <code>.env</code> : PORT, MONGO_URI, Gemini key) so secrets stay out of source control.                                   | 1            | High     | Sivaraj S           | 16 Sep 2026  | 16 Sep 2026          |
| Sprint-1 | Database Configuration (Epic 4) | USN-3          | As a developer, I can connect the app to MongoDB via a reusable <code>config/db.js</code> module that exits cleanly if <code>MONGO_URI</code> is missing or the connection fails. | 2            | High     | Sivaraj S           | 17 Sep 2026  | 17 Sep 2026          |
| Sprint-1 | Authentication (Epic 3)         | USN-4          | As a user, I can register for the application by providing my name, email and password.                                                                                           | 2            | High     | Sivaraj S           | 18 Sep 2026  | 19 Sep 2026          |
| Sprint-1 | Authentication (Epic 3)         | USN-5          | As a user, I can log in with my email & password and receive a JWT access token.                                                                                                  | 2            | High     | Sivaraj S           | 19 Sep 2026  | 20 Sep 2026          |
| Sprint-1 | Authentication (Epic 3)         | USN-6          | As a system, I can protect private routes with authentication & role middleware (Admin/Editor/Author/Reader).                                                                     | 2            | High     | Sivaraj S           | 20 Sep 2026  | 21 Sep 2026          |
| Sprint-2 | Blog Management (Epic 3)        | USN-7          | As an Author, I can create, read, update and delete my own blog posts, saved as drafts by default.                                                                                | 3            | High     | Veron Joseph Dcouto | 22 Sep 2026  | 23 Sep 2026          |
| Sprint-2 | Blog Management (Epic 3)        | USN-8          | As an Author/Editor, I can organize posts using categories and tags and change the publishing status.                                                                             | 2            | High     | Veron Joseph Dcouto | 23 Sep 2026  | 24 Sep 2026          |
| Sprint-2 | Comment Management (Epic 3)     | USN-9          | As a Reader, I can add a comment to a published blog post.                                                                                                                        | 2            | High     | Navin P             | 23 Sep 2026  | 24 Sep 2026          |
| Sprint-2 | Comment Management (Epic 3)     | USN-10         | As an Editor/Admin, I can moderate comments (pending → approved) and manage user roles.                                                                                           | 2            | Medium   | Navin P             | 24 Sep 2026  | 25 Sep 2026          |
| Sprint-2 | AI Blog Generation (Epic 3)     | USN-11         | As an Author, I can generate a full blog post from a topic and category using Google Gemini.                                                                                      | 3            | High     | Alfred Vishal A     | 24 Sep 2026  | 25 Sep 2026          |
| Sprint-2 | AI Summarization (Epic 3)       | USN-12         | As a Reader, I can request an AI-generated summary of a blog post's content.                                                                                                      | 2            | High     | Alfred Vishal A     | 25 Sep 2026  | 26 Sep 2026          |
| Sprint-2 | Testing & Execution (Epic 5)    | USN-13         | As a QA member, I can verify all endpoints with Postman/Thunder Client and export a shared collection.                                                                            | 2            | High     | All Members         | 26 Sep 2026  | 27 Sep 2026          |

Total estimated story points: 27. Remaining calendar days (28–29 Sept 2026) were reserved for Performance Testing, Project Documentation, and the final Project Demonstration.
