

Project Executable Files

Date	28 September 2026
Team ID	SWTID-2026-3342
Project Name	AI BlogNest API
Maximum Marks	3 Marks

Step 1: Submission Checklist

S.No	Item to Submit	Submitted (Yes / No / NA)
1	Complete source code (all files and folders)	Yes
2	README / Setup Guide (instructions to run the project)	Yes
3	requirements.txt / package.json / dependency file	Yes – package.json & package-lock.json
4	Database schema / seed files (if applicable)	Yes – Mongoose schemas (userModel.js, blogModel.js, commentModel.js)
5	Environment configuration file (.env.example or similar)	Yes
6	Deployed application URL (if hosted)	Partial – the API server runs locally at <code>http://localhost:5000</code> for the grading window and is cloud-deploy-ready via <code>.env</code>
7	APK / Executable binary (if applicable for mobile/desktop apps)	NA – headless backend REST API, not a mobile/desktop app
8	Dockerfile / Containerization config (if applicable)	No – planned for a future release (see Scalability & Future Plan)
9	Test files and test results	Yes – <code>thunder-client-ai-blognest-api.postman_c...</code> + Postman evidence
10	Demo video or walkthrough (if required)	Yes

Step 2: File / Folder Structure

Server/ project structure as committed to the repository.

```
AI-BlogNest/
├── Client/                (reserved for a future frontend)
└── Server/
    ├── node_modules/
    ├── src/
    │   ├── config/
    │   ├── controllers/
    │   │   ├── aiController.js
    │   │   ├── authController.js
    │   │   └── blogController.js
    │   ├── middleware/
    │   ├── models/
    │   ├── routes/
    │   │   ├── aiRoutes.js
    │   │   └── authRoutes.js
```

```
| |   └─ blogRoutes.js
| |   └─ services/
| |       └─ geminiService.js
| app.js
| server.js
| .env
| .gitignore
| package.json
| package-lock.json
| thunder-client-ai-blognest-api.postman_c...
| thunder-client-env.json
└─ README.md
```

Step 3: Deployment / Access Details

Hosted / Deployed URL	API server run locally at <code>http://localhost:5000</code> during grading; MongoDB reached via the <code>MONGO_URI</code> connection string
Login Credentials (Demo)	Demo/test account used during Postman verification - name: Test User1, email: testuser1@gmail.com, password: Test@123456
Platform / Hosting Provider	Local Node.js runtime for the API (cloud-ready via <code>.env</code> for providers such as Render or Railway); MongoDB database via Mongoose
Repository Link	https://github.com/sivaraj0827/TNskills_AIblognest
Demo Video Link	https://drive.google.com/drive/folders/1VTEAuM6-xOvMQIGtUjxzzb2j2SQYB4qw

Step 4: Run Instructions

```
1. git clone https://github.com/sivaraj0827/TNskills_AIblognest
2. cd Server
3. npm install
4. Create a .env file in the project root:
   PORT=5000
   MONGO_URI=your_mongodb_connection_string
   GEMINI_API_KEY=your_gemini_api_key
5. npm start           (or: npm run dev, using nodemon)
6. Import the thunder-client-ai-blognest-api collection into Postman / Thunder Client
7. Call /api/auth/register, /api/auth/login, /api/blogs,
   /api/ai/generate-blog and /api/ai/summarize to exercise the API
```

Step 5: Known Issues / Limitations

S.No	Known Issue / Limitation	Workaround / Status
1	No dedicated frontend UI - API-only backend	The <code>Client/</code> folder is reserved; test via Postman / Thunder Client using the provided collection
2	POST <code>/api/ai/generate-blog</code> can take up to ~38 seconds to respond	Expected behavior - the delay is external Gemini generation time, not an application defect; documented in Performance Testing
3	No Dockerfile yet	Planned for the Scalability & Future Plan phase
